BLOCK CIPHER

STREAM CIPHER

described
by

illustrated
by

processes
the input
one block
of elements
at a time

keys are reusable

produces an
output block
for each input
block

produces output
one element
at a time

pseudo random
stream is
unpredictable
with no knowledge
of the input
key

encrypts plaintext
one byte at
a time

primary advantage
is that they
are almost
always faster
and use a
lot less code

processes
the input
elements continuously
