requires more than

depicted by

SYMMETRIC ENCRYPTION

only the sender and the receiver have the key

message delay beyond normal expectation can be checked

message integrity can be checked

portrayed by

through the process of

if includes

if includes both

unlikely that the sequence number is associated with each block

in block cipher, block reordering in ciphertext may alter the meaning of the overall data sequence

reordering does not effect decryption of the blocks

genuine sender can encrypt the message successfully

receiver can decrypt and recognize the original message

time stamp

sequence number
