Concept map with the following nodes and linking phrases:

- Backups — form of → Recovery — aspect of → Mechanism
- Intrusion Detection — form of → Detection — aspect of → Mechanism
- Stop future attacks — form of → Prevention — aspect of → Mechanism
- Halting attack — form of → Response — aspect of → Mechanism
- Integrity — component of → Data Integrity
- Integrity — component of → System Integrity
- Integrity — component of → CIA Triad
- Confidentiality — component of → Data Confidentiality
- Confidentiality — component of → CIA Triad
- Confidentiality — component of → Privacy
- Availability — component of → CIA Triad
- Availability — ensures → Access
- Policy — aspect of → Security Strategy
- Mechanism — aspect of → Security Strategy
- Assurance — aspect of → Security Strategy
- Assurance — Essential to → Confidence of Owner
- CIA Triad — component of → Computer Security
- Security Strategy — component of → Computer Security
- Owners — impose → Countermeasure
- Document Falsification — is a → Integrity Attack
- Denial of Service attack — is a → Availability Attack
- Personal Information Leak — is a → Confientiality Attack
- Countermeasure — helps prevent → Attacks
- Countermeasure — helps prevent → Vulnerability
- Integrity Attack — is a → Attacks
- Availability Attack — is a → Attacks
- Confientiality Attack — is a → Attacks
- Computer Security — helps prevent → Attacks
- Computer Security — protects → Data and Services
- Adversary — perpetrates → Attacks
- Attacks — cause → Threat
- Vulnerability — which leads to → Risk
- Threat — which leads to → Risk
